## DETAILED ACTION

### *Priority*

1. An application in which the benefits of an earlier application are desired must contain a specific reference to the prior application(s) in the first sentence of the specification or in an application data sheet (37 CFR 1.78(a)(2) and (a)(5)). The specific reference to any prior nonprovisional application must include the relationship (i.e., continuation, divisional, or continuation-in-part) between the applications except when the reference is to a prior application of a CPA assigned the same application number. The status needs to be updated for application 09/838,944 (i.e. patent number).

### *Claim Rejections - 35 USC § 103*

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1 and 69 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kobayashi (4,754,971) in view of Kawamatsu (5,766,087).

Kobayashi discloses set of numbered irons having heads progressing from a high numbered head to a low numbered head, a progressively decreasing loft angle in going from a high numbered head to a lower numbered head (Col. 2, Lns. 19-37), individual faces having a series of grooves of common cross sectional shape from the top to the bottom (Fig. 2e), grooves being configured to provide decreasing ball spin in going from the lower numbered head to a higher numbered head if a ball were hit by faces by identical impacts at the same loft in the form of the coefficient of friction increases from a 9 iron to a 2 iron (Fig. 3, curve E and F), and individual grooves have a base and opposing sidewalls which diverge from the base and extend outwardly in the direction of the front striking face and the base having one protrusion which extends into the groove (See enclosure).

Kobayashi lacks grooves being of different cross sectional shape in a pair of heads in a set. Kawamatsu discloses grooves being different in a set in order to improve the function of back spin efficiency (Col. 1, Lns. 22-32, Col. 4, Lns. 5-13). In view of the patent of Kawamatsu it would have been obvious to modify the set of clubs of Kobayashi to have grooves being of different cross sectional shape in a pair of heads in a set in order to change the coefficient of friction on the faces without changing the number of the grooves for a head to make all the heads appear similar in a set or in order to be able to utilize a different method of changing the coefficient of friction of a face used in the market.

***Transitional After Final Practice***

4. All claims are drawn to the same invention claimed in the application prior to the entry of the submission under 37 CFR 1.129(a) and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the application prior to entry under 37 CFR 1.129(a). Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action after the submission under 37 CFR 1.129(a). See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
